

Module Name: Data Sciences for Life Science I

Module Lead: John Watkins

MON							TUE							WED							THU							FRI						
WEEK 1	09:00																																	
	10:00																																	
	11:00	1		2								3		4																				
	12:00																																	
	13:00																																	
	14:00	T		T										T		T																		
	15:00																																	
WEEK 2	09:00																																	
	10:00																																	
	11:00	5		6								7		8																				
	12:00																																	
	13:00													SET																				
	14:00	T		T										T		T																		
	15:00																																	
WEEK 3	09:00																																	
	10:00																																	
	11:00	9		10								11		12																				
	12:00																																	
	13:00																																	
	14:00	T		T										T		T																		
	15:00																																	
WEEK 4	09:00																																	
	10:00																																	
	11:00	13		14																														
	12:00																																	
	13:00			SET																														
	14:00	T		T																														
	15:00																																	
WEEK 5	09:00																																	
	10:00																																	
	11:00																																	
	12:00													DUE																				
	13:00													DUE																				
	14:00																																	
	15:00																																	
Module Start														Week 1																				
Module End														Week 5																				
Assignment 1 (Set)														Week 2																				
Assignment 1 (Due)														Week 5																				
Assignment 2 (Set)														Week 4																				
Assignment 2 (Due)														Week 5																				

Session Title	Provisional Deliver Team	Notes
1. Introduction to Data Science - Data and Code I		MET581 (Richard Anney)
2. Introduction to Data Science - Data and Code II		MET581 (Richard Anney)
3. Introduction to R		MET581 (Mateus Bernardo-Harrington)
4. Data Wrangling in R I		MET581 (Mateus Bernardo-Harrington)
5. Data Wrangling in R II		MET581 (Mateus Bernardo-Harrington)
6. Programming in R		MET581 (Mateus Bernardo-Harrington)
7. Exploratory Data Analysis in R		MET581 (Mateus Bernardo-Harrington)
8. Data Visualisation in R		MET581 (Mateus Bernardo-Harrington)
9. Probability, Data Sampling and Distributions in R I		MET582 (Christopher Wills)
10. Probability, Data Sampling and Distributions in R II		MET582 (Christopher Wills)
11. Statistical Experiments and Significance Testing in R I		MET582 (Daniel Farewell)
12. Statistical Experiments and Significance Testing in R II		MET582 (Daniel Farewell)
13. Regression and Prediction in R I		MET582 (John Watkins)
14. Regression and Prediction in R II		MET582 (John Watkins)

## Academic Skills - Technical Reports		
## Academic Skills - Writing Code		

Assessment Type	Weighting	Tariff	Set Date
CW - Short Answer Question: Programming in R	25%	1000 words	Week 1; Week 5
CW - Short Answer Question: Applied Statistics	25%	1000 words	Week 2; Week 5
RP - Report: Pipelines for Applied Statistical Analysis in R	50%	2000 words	Week 3; Week 5
